<tr>
<td>3</td>
<td>ACS</td>
<td>Access Control System</td>
</tr>
<tr>
<td>4</td>
<td>OCC</td>
<td>Ops Center Client</td>
</tr>
</tbody>
</table>

Table 1: Abbreviations

3. Version and Licensing Information
Version 3.x and above of the plugin requires VideoXpert version 3.1.x and higher in order to communicate to the VideoXpert system.

As of VideoXpert version 3.1.x, licensing is required to operate the plugin within VideoXpert Ops Center. The part number for the Access Control System Viewer is “INT-ACSPLUGIN”.

4. System Overview
The Access Control System Viewer is an OCC Plug-in that enables the communication and data exchange from various Access Control Systems to the VideoXpert system. A server component, called an Access Control Server, communicates directly to the Access Control System and relays information to the Access Control System Viewer while relaying events between the Access Control System and VideoXpert. While the ACS Server handles events, it also provides other information to the Access Control System Viewer, such as user images that the Access Control System Viewer may display in association with events injected by the ACS Server.
5. Platform Specification
